

## Projects - Healthcare

Close Care Development  
Roundwood, Norfolk

Sixty bed nursing home on a 7.5 acre woodland site incorporating retirement apartments and leisure/bowls club

### Healthcare various

From its inception BD+M has gained considerable experience working within the Healthcare sector. Projects range from the project management and design of services on main healthcare sites in Norwich and around the country. Individual schemes for chiropractic clinics and doctor's surgeries involving both new build and refurbishment have been carried out by the Company. Significant studies have been made in respect of interior design and the use of colour as part of the healing process and currently much emphasis is placed on care for the elderly. The nature of these commissions often involves working closely with healthcare professionals and social services.
